

# ASSIGNMENT 4

1. Design a login form using HTML. As soon as the login button is clicked the login page should redirect to a page with a form as given below:

**Form Validation**

Name:	<input type="text"/>
Username:	<input type="text"/>
Password:	<input type="password"/>
Re-type password:	<input type="password"/>
Gender:	<input type="radio"/> Male <input type="radio"/> Female <input type="radio"/> Other
Programming skills:	<input type="checkbox"/> Java <input type="checkbox"/> Android <input type="checkbox"/> Ruby <input type="checkbox"/> .Net
Contact no:	<input type="text"/>
Email:	<input type="text"/>
College:	<input type="text" value="Select college"/>
	<input type="button" value="Submit"/>

The submit button in the form must be linked to a thank you page. So that as soon as the submit button is clicked, it redirects to the thank you page.

**(Note: Use meta tag and comments where ever required)**
